

## ABSTRACT OF THE DISCLOSURE

5           Methods and apparatus for linking a set of code modules for execution  
includes determining one or more code modules to be executed, ascertaining a  
hierarchical order in which the one or more code modules are to be executed, loading  
the one or more code modules to be executed, and building a chain connecting the one  
or more code modules such that the one or more code modules will automatically  
10   execute in the hierarchical order when a first one of the one or more code modules is  
executed.
